# OGDENITE BACK FROM IRELAND

M. J. Clifford Tells of Exciting Experience With English Police

Even Americans are not safe from indignities, in Ireland at present, according to Michael J. Clifford, 2441 Quincy avenue, who returned Friday Quincy avenue, who returned Friday morning, after having spent three months in England and Irelag2.

"For five weeks I was in Limerick and County Claire, Ireland." Mr. Clifford said, "and during that time I saw and submitted to indignities that made my American blood boll"

"Treland is apparently policed at present by renegades, and the constabulary seems to be permitted to do anything.

COVERED WITH RIFLES

COVERED WITH RIFLES.

On one occasion, my brother, Jack, and I were returning to our home. It was not later than 9 o'clock. As we passed the Munster Bank of Ireland, a motor lorry drove to the curb. Seven armed policemen accepted us and foredus to throw up our hands, all seven covering us with rifles.

"What the are you two doing out at this time of night," the leader advanced and demanded. "Coing home," we replied At that Mr. Cliftord states, the leader advanced and knocked the pipe which I was smoking from my mouth."

"We were then searched and American credentials, including my passinort were taken from me. The officer had little or no respect for my papers and returned them only after I had refused to move without them. "My pipe, which was lying on the side-walk, was picked up and appropriated by one of the soldlers."

"Because of the lack of principle or the slightest spark of regard for a fellow being, I cannot help but believe that only the scum of the English fails are at present engaged as policemen in Ireland.

"PROPERTY DESTROYED.

PROPERTY DESTROYED.

PROPERTY DESTROYED.

"Destruction of property and indiscriminate shooting at show windows and other objects is a common sight which I witnessed in Limerick.

"Upon one occasion, I witnessed a group of soldiers surround a magnificent street clock in front of "Tates," I cannot recall the name of the street where the clock was located. The soldiers, facing the four sides of the clock which, like the Lewis Jewelry company clock has four faces, fixed scores of bullets into the clock and concluded their amissement by shooting through show windows, as they ing through show windows as they made their way up the street. "Scotch apidiers are not stationed in Ireland, because they take sides with the peo-

"Motoring in England is anything but a pleasure. One can travel for ten miles on some occasions before the car is stopped and searched. If noth-ing of a compromising nature is found, the car is allowed to progress, to be stopped by other guards stationed far-ther along the road.

both Ireland and England, that Utah looked good to him
"The United States should not interfere and the only way for this country to help is to extend sympathy to the Irish," he said.

# START AUGUST 20

Open season on grouse, including sage hens, prairie chicken, pennated or ruffled grouse, pine hens and the blue and dusky

hens and the blue and dusky grouse has been declared by the state, arrording to information given out last night by President A. T. Hestmark, of the Weber County Rod and Gun association. In every county of the state the season will extend from August 29 to August 31. No hunter will be allowed to bag more than eight birds during the season. Sportsmen of Weber county are preparing for the opening of the season, and from all indications the season this year will surpass all others. More interest has been manifested in the sport and with the 1220 season at hand the sport is expected to become an annual favorite.

## What Every Woman Should Know About Her Blood

Physicians Tell How Red Blood, Rich in Iron, Lifts Women to Health, Strength and Happiness, While Thin, Watery Blood Lacking Iron Drags Them Down to a Sickly, Worn-Out Condition - Explain How Organic Iron, Like Nuxated Iron, Helps Build New Rich Red Blood.

"Strength and vitality of body and mind are derived from the blood and the blood in turn derives it from the food we eat and the oxygen contained in the air we breathe," says Dr. John J. Van Horne, formerly Medical Inspector and Clinical Physician on the Board of Health of the City of New York. "But un less the blood is rich in iron to increase its oxygen-carrying power it cannot develop living tissue, muscle and brain or keep active the vital forces.

"It is surprising how many people who do not get along in life are in reality suffering from iron deficiency and do not know it. To supply this lack of Iron and help build arronger, healthler men and women, better able physically to meet the problems of every day life, legister men and women, better able physically to meet the problems of every day life, legister that physicians should, at every opportunity, prescribe organic iron—Nuxated from for in my experience it is one of the best to iron; and red blood builders known to medical acisance."

Commenting on the use of Nuxated Iron as a tonic, strength and blood-builder by over four million people annually, Dr. James Francis Builtivan, formerly physicals of Believus Hoshital Courtour Dept.), New York and the Westchester County Hospital, said: "Meddern methods of cooking and the rapid pace at which people of this century live has made such an alarming increase in iron deficiency. I am convinced that there are the thought the millions of such women the result of the millions of disease germs that are almost the mil

# GEM STATE GIRL

Mrs. Gurtha Wheeler, who gave her age as 17, was halted in what promised to be an unrestrained matrimonial career when arrested in Ogden Thursday in company of Roy Henrici, who supposed

himself the husband of Mrs.

Wheeler. Mrs. Wheeler appeared before the city court yesterday morning on charges preferred by her legal en charges preferred by her legal husband after federal authorities had declined to prosecute Mrs. Wheeler and David Stauffer for alleged violation of the Mann act. According to Mrs. Wheeler's story, she married George Wheeler, 33 years old, at Caldwell, Ida., April 21, 1218. On October 10, 1918, she deserted her husband, she alleges, while living in Ogden. During the time she deserted Wheeler and met Henricl, she made two trips from Utah to wheeler and met Henrici, she made two trips from Utah to Westwood, Cal., in company with Stauffer, the police say, these trips constituting a violation of the Mann act according to the

trips constituting a violation of the Mann act according to the officers.

At Westwood she met Ray Hearici, on March 29, Henrici had just been relased from military service. On March 27, the couple were married. Mrs. Wheeler professing to be a divorcee it is said. The couple moved to Ogden and established a home. Early this week. Wheeler met Henrici and his supposed wife. He told Henrici that if they loved one another that they were free to marry as soon as he had obtained a divorce. Henrici said that this statement was his first intimation he had that the girl he married had no legal right to become his wife.

Wheeler swore out a complaint against his wife, charking her With statuory offense. She walved preliminary hearing before Judge D. R. Roberts yesterday morning and was bound over to the district court for trial, with

morning and was bound over to the district court for trial, with ball fixed at \$50. Mrs. Wheeler is at present un-der the care of the city physician.

#### STRUGGLE FORECASTED AT VETERANS' MEETING

VANCOUVER, B. C., Aug. 14 .- (By Canadian Press.)—There are indica-tions that there will be at least one strenuous struggle when on October 11, the annual convention of the army and navy veterans association of Can-

and appens here.

Western commands are determinedby preparing to wage a big fight to
bring about a change in the qualificritions which entitle a man to memership in the association.

At present to be entitled to mem-bership, a man must have served six years with the imperial forces or have had nine years with the active militia, or must have won a war decoration. The proposed change calls for only three years' service with the active militia or in the regular army, or six months with the Canadian expedition-ary force.

D. & R. G. "Red Book" Contains Review of State's Mineral Deposits

The August issue of the Railroad Red Book, published by Denver & Rio Grande railroad, praises Utah's re-source. The article follows:

The eyes of the world are directed to Utah's remarkable resources. Jap-an is interested in phosphate rock, coal, iron and chemicals. England wants Utah's oil shale, various Europ-can countries are trying to get control of the iron and coal resources of Utah, and American capital is waking up to the fact that in Utah lies the chemical and mineral storehouse of the United

STUDY RESOURCES. "During the past few months Japan has had a dozen of her prominent en-

gineers studying the resources of Utah It is still early to forecast the result of this study and its effect on Utah resources, but it is an undeniable fact resources, but it is an undeniable fact that unless American interests sec and grasp the opportunities that Utah offers they will find that the iron, the coal and the oil shale of this state have been sold to foreign interests on long term contracts.

"It is impossible to estimate the

mineral and chemical possibilities of a state whose wealth is so enormous and so varied that it reaches prominently into every article manufactured in the United States. To cite the ex-ample of the Utah Copper company mine at Bingham is to give one glimpse of the vast possibilities of Utah. Oper-ating on a scale considered impossible ten years ago the Utah Copper company is moving a mountain of low-grade ore with steam shovels. The mine has been profitable to the extent of \$100.000.000 in dividends.

of \$100.000.000 in dividends.

MINERALS ABOUND.

And the Bingham mine is only one mine in Utah. Silver, lead, zinc, gold, the rare minerals, all abound in Utah, awaiting the marvelous touch of man and the resourcefulness of American mining genius. There are handicaps to successful mining in Utah. There are problems of transportation, there are problems of transportation, there are problems of proper processes for are problems of transportation, there are problems of proper processes for ore reduction. But the minerals are here. Nothing can remove them but the work of man and these billions of dollars of wealth in the mountains of Utah are safe until problems are overcome and processes evolved to make the mining of these mountains of riches profitable.

"Another problem is the question of

come and processes evolved to make the mining of these mountains of riches profitable.

"Another problem is the question of markets. Numerous Uiah metals are accessible in large quantities, but the lack of a profitable market retards development. Let us talk about coal Let us stop to consider how enormously fabulous in figures is the coal wealth of Utah. Thousands of millions of tons, all ready to be mined, of good coal walting for markets. Carbon county in central Utah is reported to have more coal than the entire state of Pennsylvania, according to the estimate of the United States Geological Survey. This same authority estimates that there is a ton of coal underlying every square foot of ground in Carbon county, and there are 1,492 square feet of area in Carbon county.

Construction work on the proposed Ogden armory will not start until next spring, according to the plane, according to information of \$95,000 it is pointed out that this is conditional \$15,000, the price of the site. This amount has not been collected and the information is given out that this amount must be collected and the site purchased before the work is started.

The proposed new armory will replace the old building on Twenty-fourth street and will in all probability be located at a site just east of Washington avenue on Twenty-third street.

The building will be two stories with full basement and will be equipped to the plane.

in Carbon county, and there are 1,498 square feet of area in Carbon county, and the cord feet of the proper feet of a full basement

# Is Chiropractic Scientific?

Science is classified knowledge. It does not depend upon chance, or luck, or guesswork, if a method is scientific it must work out—not sometimes but all the time.

No method of combating disease has ever deserved to be called sci-intific until Chiropractic was developed. The treating of disease by remedies is an art in which skill in diagnosis and in predicting the rather dublous reaction of the patient to the remedy may bring good results.

Chiropractic is a Science. The Chiropractor is trained to detect spinal abnormalities by hand and verified by X-Ray until he knows, with absolute certainty, the position and relation of the spinal bones. His methods of adjusting these are so exact, so specific, that he can be absolutely positive that the adjustment will be followed by just one result—the utmost effort of Nature to cure. The only element of uncertainty left—the only reason why a Chiropractor can not promise a complete cure to every patient in the world—is the possibility that the case has gone so far that Nature herself will not cure it, which means that no treatment on earth would be of any available. that no treatment on earth would be of any avail,

Chiropractors do not depend for their success upon the uncertain elements which form a basis of other methods. The very simplicity of the system makes for accuracy. For instance, the Chiropractor knows—not guesses—but knows—what organs in the body are weak or diseased after he has analyzed the spine. Conversely, he also knows which organs are healthy and sound. His word is the word of authority. There are things about disease which he can not find out in this way, but these things are not essential to the cure, and here again the scientific nature of the system shows itself. He knows, with a certainty from the beginning, what is hidden from him. He never mistakes a guess for a fact.

it is because Chiropractic is exact, specific and definite, that Chiropractors achieve a higher percentage of results than any other profession.

# Take the advice of highest medical authorities

THERE have been many conflicting claims as to the proper I treatment and care for the hair. There has been much confusion and ignorance. Now the confusion is ended. The way is known definitely-safely.

Everyone (men and women and children) should have healthy hair. Nature provided it in the beginning. Proper treatment will preserve it through life. The most eminent authorities have prescribed the way to prevent the loss of the hair's life and luxuriance.

### Highest authorities

The Council of the American Medical Association (the highest authority known) has recognized Resorcinol Monoacetate for the treatment of dandruff (seborrheal eczema) and baldness (alopeciaarcata)-the common foes of beautiful hair. Resorcinol Monoacetate is the principal ingredient of "La Creole"

Hair Tonic. Thus science approves this wonderful preparation. Abundant vigorous hair is now easily attained.

"La Creole" Hair Tonic to the scalp. Moisten the hair and scalp thoroughly -massaging the scalp with a rotary motion of the finger tips. Scalp circulation is then stimulated, the hair roots supplied with needed nourishment, and dandruff quickly eliminated. You will notice an immediate improvement in the loveliness of your

Do not be confused by the word "Creole." The wonderful hair of the Creoles is a mark of their pure French-Spanish blood as well as of the care given it. "La Creole" preparations are their favorites.

#### Proper shampooing

Absolute cleanliness is essential for beautiful, healthy hair. The scalp is constantly throwing off old skin and extraneous substances. If the pores and hair tubes are clogged with dirt and perspiration, a healthy condition of the hair is impossible. Regularly every ten days or two weeks shampoo the hair thoroughly with "La Creole" Liquid Shampoo

"La Creole" Liquid Shampoo is made from an exclusive menthol formula of purest cocoanut and cochin oils. You will instantly notice the delightful, cooling effect from its use. The hair becomes soft and lustrous—dries quickly—and the scalp and pores glow with clean health and vigor.

Always apply "La Creole" Hair Tonic after shampooing. Follow these rules faithfully and notice the improvement in the loveliness of your hair.

When purchasing "La Creole" Liquid Shampoo be sure to get the "La Creole" Hair Tonic also, because the formula of each is

designed to aid the other,

"La Creole" Hair Dressing

is a treatment for the gradual restoration of the Natural Dark Color to hair that has grown gray, gray-streaked or faded. It must not be confused with common dyes. Refinement approves its use. At Drug Stores and Department Stores
